The year of 2006 is the decennial of RoboCup series competition, and also the fifty year ceremony of Artificial Intelligence. It deserves special celebration that RoboCup China Committee won the host of RoboCup 2008 for the first time, which would be co-hosted again by RoboCup China Committee, Municipal Government of Suzhou and University of Science and Technology of China. The successful host of RoboCup China Open 2006 has proven soundly, and we also have the very confidence that RoboCup 2008 in China would become one of the most impressive and wonderful competition during the history of RoboCup.
